80%+

faster report generation

50%+

faster AUM and holdings APIs

500+

Relationship Managers served

~30%

less dev time with AI tools

PROFESSIONAL SUMMARY

4 years 9 months of .NET Full Stack Development in wealth management, banking and lending: RESTful ASP.NET Core Web APIs and microservices in C#, Angular and React front ends, SQL Server and PostgreSQL, and Azure DevOps CI/CD. Built a React and Claude LLM chatbot with RAG on pgvector that makes report generation **80%+ faster** for **500+ Relationship Managers (RMs)**, and cut AUM and holdings API response times by **over 50%**. Has owned a module end to end, reviews pull requests and mentors junior developers.

TECHNICAL SKILLS

Backend: C#, .NET 8, .NET 6, .NET Core, .NET Framework 4.x, ASP.NET Core Web API, ASP.NET Web API, ASP.NET MVC, RESTful APIs, Microservices, Entity Framework Core (EF Core), LINQ, Swagger/OpenAPI

Frontend: Angular (12 to 18), TypeScript, JavaScript, RxJS, NgRx, Reactive Forms, Angular Material, React / ReactJS (Hooks, Context API, React Query, Axios, Vite), Next.js, HTML5, CSS3

Databases: SQL Server 2019, PostgreSQL, T-SQL, Stored Procedures, Query Optimization, pgvector

Cloud & DevOps: Azure App Service, Azure Functions, Azure DevOps (ADO), CI/CD Pipelines, AWS S3, AWS EC2, AWS Lambda, Docker, Kubernetes (working knowledge), Git, TFS

Architecture & Security: Clean / Onion / N-Layer Architecture, API Gateway, Micro-frontends, SOLID, OOP, Dependency Injection, Design Patterns (Repository, Unit of Work, Factory, Strategy, Singleton, Facade, Adapter, Observer), Application Security, Secure Coding, JWT, RBAC, Data Encryption

Testing & Ways of Working: Unit Testing, Integration Testing, xUnit, NUnit, MSTest, Moq, Jasmine/Karma, Postman, Code Reviews, Debugging & Problem Solving, Cross-functional Collaboration, Agile/Scrum, Jira

AI & GenAI: Claude LLM, LLM Integration, Retrieval-Augmented Generation (RAG), Agentic Workflows, Model Context Protocol (MCP), AI Coding Assistants (Claude Code, GitHub Copilot, Amazon Q Developer), Python, Scikit-learn

PROFESSIONAL EXPERIENCE

Software Engineer | NeoSoft, Mumbai, India

07/2025 - Present

Client: **Motilal Oswal** (wealth management and broking); services on AWS EC2 and S3.

- Cut AUM, holdings and reporting REST API response times by **over 50%** by optimizing ASP.NET Core (.NET 8) Web API endpoints and T-SQL queries on SQL Server 2019.
- Secured the APIs with JWT authentication and data encryption for API traffic and sensitive financial data.
- Built ASP.NET MVC (Razor) screens in the older .NET Framework 4.x parts of the Motilal Oswal codebase.
- Cut development time by about **30%** by using Claude Code, GitHub Copilot, Amazon Q Developer and MCP-based tooling for code generation and SQL optimization.
- Owned a module end to end (requirements with RMs and product owners, design, build, TFS/TFVC, Azure DevOps CI/CD release, production support); reviewed and approved pull requests and mentored junior developers.

Project: AI-Driven RM Chatbot and Reporting Platform

Stack: React, TypeScript, ASP.NET Core Web API, SQL Server 2019, PostgreSQL (pgvector), Claude LLM, RAG, Python, Scikit-learn

- Delivered **80%+ faster** report generation than the manual process for 500+ RMs by automating structured reporting for **5 product lines** (Mutual Funds, PMS, AIF, Broking, Private Wealth Management) with agentic Claude LLM reasoning and rule-based processing.
- Built the ASP.NET Core Web API layer on SQL Server 2019 (validation, deduplication, authentication) and integrated Python/Scikit-learn ML components, internal APIs and RPA workflows into the report pipeline.
- Implemented RAG on PostgreSQL pgvector to retrieve relevant context and improve answer accuracy, and developed the React and TypeScript chat UI for RMs (Hooks, Context API, React Query, Axios).

Project: RM Portal (CRM and Wealth Management Platform)

Stack: Angular 17+, React, Next.js, ASP.NET Core Web API (.NET 8), Entity Framework Core, SQL Server 2019, AWS S3, Docker, CI/CD

- Reduced manual data-entry errors **15%** by delivering CRM modules for client interactions, meetings and opportunities in Angular 17+ and React/Next.js.
- Built the portal's RESTful ASP.NET Core (.NET 8) Web APIs with Entity Framework Core (Repository and Unit of Work) on SQL Server 2019: business logic, validation, data aggregation, filtering and pagination.
- Surfaced AUM, revenue, holdings and RM-performance analytics for **500+ RMs** by building Portfolio Insights dashboards with reusable Angular 17+ components, Reactive Forms and Jasmine/Karma tests.
- Centralized RM document management on AWS S3 by building WealthFlow with secure upload, metadata, naming conventions, duplicate handling and audit trails.

Software Engineer | Alphacentrix, Mumbai, India

10/2023 - 07/2025

Saudi Arabia banking application on .NET microservices and Azure Functions; full stack .NET and Angular in Agile/Scrum with cross-functional teams.

- Developed C# and ASP.NET Core (.NET 6) RESTful Web APIs for account management, transaction processing, customer operations and financial reporting as independently deployable microservices for scalability and fault isolation.
- Delivered complex banking workflows in Angular (started on Angular 12, upgraded to Angular 18) with reusable components, services, Reactive Forms and NgRx for centralized state.
- Secured the bank's account and transaction APIs with authentication, role-based authorization (RBAC), server-side input validation, secure API communication and consistent API-level exception handling.
- Improved API performance across account, transaction and reporting services with optimized PostgreSQL and SQL Server 2019 queries, pagination and a structured service layer using Factory and Strategy patterns.
- Wrote xUnit/NUnit unit tests with Moq for the banking microservices and Jasmine/Karma tests for Angular components.

Software Engineer (Delivery) | Mastek Ltd., Mumbai, India

01/2022 - 10/2023

Full stack .NET (.NET Framework 4.x and .NET Core) and Angular development of internal enterprise and lending applications, some hosted on Azure App Service.

- Delivered Loan Management System workflows in ASP.NET Web API, Angular and SQL Server for loan processing and status tracking, integrating Aadhaar validation, OTP verification and Azure token-based services.
- Developed ASP.NET Core Web API and Angular features for internal enterprise apps (search/filtering, reporting, status tracking) with client- and server-side validation.
- Wrote complex queries, stored procedures and joins with transaction handling for loan and enterprise data in SQL Server (T-SQL) and PostgreSQL.
- Debugged and resolved production issues and improved performance in lending and enterprise apps, and wrote NUnit/MSTest unit tests for layered C# code (SOLID, OOP, Repository pattern).

EDUCATION

M.Tech, Computer Engineering, Ganpat University

2020 - 2022

B.E., Computer Engineering, St John College, Mumbai (University of Mumbai)

2016 - 2020

CERTIFICATIONS

- Machine Learning with Python – Essentials Badge (IBM)
- .NET Full Stack Foundation Certification (Mastek)
