80%+

faster report generation

50%+

faster AUM and holdings APIs

500+

Relationship Managers served

~30%

less dev time with AI tools

PROFESSIONAL SUMMARY

4 years 9 months of .NET Full Stack Development (C#, ASP.NET Core, Angular, SQL Server, PostgreSQL) in wealth management, banking and lending. Built a React and Claude LLM chatbot with RAG on pgvector that makes report generation **80%+ faster** for **500+ Relationship Managers (RMs)**, and cut AUM and holdings API response times by **over 50%**. Has owned a module end to end, reviews pull requests, mentors junior developers and gathers requirements directly with technical and non-technical stakeholders. Based in Mumbai; open to relocating to Pune.

TECHNICAL SKILLS

Backend: C#, .NET 8, .NET 6, .NET Core, ASP.NET Core Web API, ASP.NET Web API, RESTful APIs, Entity Framework Core (EF Core), LINQ, Swagger/OpenAPI

Frontend: Angular (12 to 18), TypeScript, JavaScript, RxJS, NgRx, Reactive Forms, Angular Material, React / ReactJS, Next.js (Hooks, Context API, React Query, Axios, Vite), HTML5, CSS3

Databases: SQL Server 2019, PostgreSQL, T-SQL, Stored Procedures, Query Optimization, pgvector

Cloud & DevOps: Azure App Service, Azure Functions, Azure DevOps (ADO), CI/CD Pipelines, AWS S3, AWS EC2, AWS Lambda, Docker, Kubernetes (working knowledge), Git, TFS

Design & Architecture: System Design, Microservices, API Gateway, Micro-frontends, Clean Architecture, Onion Architecture, N-Layer Architecture, SOLID, OOP, Dependency Injection, Design Patterns (Repository, Unit of Work, Factory, Strategy, Facade, Adapter, Observer)

Security: Application Security, Secure Coding, JWT Authentication, Role-Based Access Control (RBAC), Data Encryption, Input Validation

Testing & Practices: Unit Testing, Integration Testing, Automated Testing, xUnit, NUnit, MSTest, Moq, Jasmine/Karma, Debugging & Problem Solving, Code Reviews, Cross-functional Collaboration, Stakeholder Communication, Agile/Scrum

AI & GenAI: Claude (Anthropic), LLM Integration, Retrieval-Augmented Generation (RAG), Agentic Workflows, Model Context Protocol (MCP), AI Coding Assistants (Claude Code, GitHub Copilot, Amazon Q Developer), Python, Scikit-learn

PROFESSIONAL EXPERIENCE

Software Engineer | NeoSoft, Mumbai, India

07/2025 - Present

Client: Motilal Oswal (wealth management and broking).

- Delivered report generation **80%+ faster** than the manual process for 500+ RMs by building an AI chatbot with React, ASP.NET Core Web API, Claude LLM and RAG on pgvector.
- Cut AUM, holdings and reporting API response times by **over 50%** through optimized C# endpoints on .NET 8 and T-SQL queries on SQL Server 2019.
- Cut development time by about **30%** by using Claude Code, GitHub Copilot, Amazon Q Developer and MCP-based tooling for code generation and SQL optimization.
- Owned a module end to end, from requirements with RMs and product owners through design, TFS source control, Azure DevOps CI/CD release and production support for operational stability, while reviewing pull requests and mentoring junior developers.

Project: AI-Driven RM Chatbot and Reporting Platform

Stack: React, TypeScript, ASP.NET Core Web API, SQL Server 2019, PostgreSQL (pgvector), Claude LLM, RAG, Python, Scikit-learn

- Automated structured reporting for **5 product lines** (Mutual Funds, PMS, AIF, Broking, Private Wealth Management) by combining agentic Claude LLM reasoning with rule-based processing and RPA workflows, integrating Python/Scikit-learn ML components with the ASP.NET Core application.
- Gave RMs a self-service chat interface by building a React and TypeScript front end with Hooks, Context API, React Query and Axios.

Project: RM Portal (CRM and Wealth Management Platform)

Stack: Angular 17+, React, Next.js, ASP.NET Core Web API (.NET 8), Entity Framework Core, SQL Server 2019, AWS S3, Docker, CI/CD

- Reduced manual data-entry errors **15%** by delivering CRM modules for client interactions, meetings and opportunities in Angular 17+ and React/Next.js with ASP.NET Core, structured with Repository and Unit of Work patterns over EF Core.
- Surfaced AUM, revenue, holdings and RM-performance analytics for **500+ RMs** by building Portfolio Insights dashboards with reusable Angular 17+ components and Reactive Forms.
- Centralized RM document management on AWS S3 by building WealthFlow with secure upload, metadata, duplicate handling and audit trails.

Software Engineer | Alphacentrix, Mumbai, India

10/2023 - 07/2025

Saudi Arabia banking application; full stack .NET and Angular in Agile/Scrum with cross-functional teams.

- Powered account management, transaction processing, customer operations and financial reporting by building ASP.NET Core (.NET 6) RESTful Web APIs as independently deployable microservices designed for scalability and fault isolation.
- Shipped complex Saudi banking workflows in Angular (started on Angular 12, upgraded to Angular 18) through reusable components, services and Reactive Forms, with NgRx for centralized state.
- Hardened the bank's account and transaction APIs with secure coding: RBAC, authentication, server-side input validation, secure API communication and consistent exception handling.
- Improved API performance across account, transaction and reporting services through optimized PostgreSQL and SQL Server 2019 queries, pagination and a structured service layer built with Factory and Strategy patterns.

Software Engineer (Delivery) | Mastek Ltd., Mumbai, India

01/2022 - 10/2023

Full stack .NET and Angular development of internal enterprise and lending applications.

- Delivered validated loan processing and status tracking across the end-to-end loan lifecycle by building Loan Management System backend workflows with Aadhaar validation, OTP verification and Azure token-based services.
- Delivered search/filtering, reporting and status tracking for internal enterprise apps by building ASP.NET Core Web API workflows with client- and server-side validation.
- Protected loan and enterprise data integrity in SQL Server (T-SQL) and PostgreSQL by writing complex queries, stored procedures and joins with transaction handling.
- Resolved production issues and improved performance in lending and enterprise apps through debugging and NUnit/MSTest unit tests on layered C# code built with SOLID principles and the Repository pattern.

EDUCATION

M.Tech, Computer Engineering, Ganpat University

2020 - 2022

B.E., Computer Engineering, University of Mumbai

2016 - 2020

CERTIFICATIONS

- Machine Learning with Python – Essentials Badge (IBM)
- .NET Full Stack Foundation Certification (Mastek)
